Workshop on

“Role of UNEP IETC for Sustainable Development”

8 March 2012, Osaka University, Suita Campus

Organized by UNEP (United Nations Environmental Programme), IETC
Osaka University, CEIDS

For sustainable development, in 2000, the United Nations Millennium Summit agreed on eight Millennium Development Goals (MDGs) to be achieved by 2015. Goal 7 – Ensure Environmental Sustainability – has three targets:

1. Integrate the principles of sustainable development into country policies and programs and reverse the loss of environmental resources.
2. Halve, by 2015, the proportion of people without sustainable access to safe drinking water and basic sanitation.
3. Have achieved, by 2020, a significant improvement in the lives of at least 100 million slum dwellers.

To support the implementation of these goals and targets, various international, national and local organizations are undertaking activities. UNEP as the specialised UN agency for environment was formed in 1972 is leading various activities meet MDGs. UNEP has various divisions and offices for specific tasks. IETC (International Environmental Technology Centre) is a branch under the Division of Technology, Industry and Economics (DTIE). UNEP IETC is currently working on waste management and water and sanitation.
